

Call for Papers

In January of 2007 we plan to launch *Fly*, the first international peer-reviewed journal to focus exclusively on *Drosophila* research. *Fly* will publish broadly three general types of papers: original research, methods and technical advances and reviews and meeting reports.

We will distinguish *Fly* from other journals in two important ways.

First, we plan to have regular features of specific interest to the *Drosophila* community. For example: What's new on Flybase? How do I get my hands on all of those new stocks for doing that new cool technique? Who are the new researchers in the *Drosophila* field and what are they doing? What really great *Drosophila* papers were published recently? What's happening in those fields of *Drosophila* research outside my own? Is it possible to get a grant to do *Drosophila* research these days?

Second, we want the journal to be highly interactive. We plan to develop a lively *Letters to the Editor* section, where issues of interest to the *Drosophila* community can be discussed, and where researchers can ask questions (and get answers!) about new resources and about how to obtain materials, comment on recent papers, make suggestions for new features in *Fly*, etc.

Topics in *Drosophila* research we plan to include: cell biology, development, gene regulation, chromosome dynamics, behavior, evolution, population biology, neurobiology, molecular biology and biochemistry, genomics and anything else that we may have left out or might come along.

Type of Papers:

Original Research • Brief Communications • Review Articles •
Methods and Technical Advances • Opinion Essays •
Commentaries • Meeting Reports

If you have interesting data, an original hypothesis or timely commentaries on significant developments related to the topics covered by *Fly*, please see our submission guidelines at www.landesbioscience.com/journals/fly/guidelines.php. You may contact the Editor-in-Chief, Janice Fischer (fly-fischer@landesbioscience.com), any member of the Editorial Board (www.landesbioscience.com/journals/fly/edboard.php) or Shannon Silva at Landes Bioscience (shannon@landesbioscience.com).
